Pictometry

Sell Sheet

Updated: 7/2011

"See Everywhere, Measure Anything, Plan Everything!"
…BEFORE you arrive on the project

Pictometry is a unique web-based tool that captures aerial images from an angle, creating natural three-dimensional views so users can clearly capture entire structures, including roof layouts and land features in their entirety.

Who Can Use It?

What are the Benefits?

ADD CREDIBILITY TO YOUR BUSINESS
High resolution imagery included in job proposals adds credibility and professionalism – proven to increase the rate of bids won.

BE MORE EFFICIENT
Qualify jobs before stepping out of your office. By pre-measuring the roof, you can arrive at the job site prepared to talk numbers and close the sale.

GROW SALES
Bid jobs when it's raining, snowing, or even in the middle of a hurricane. While your competitors are sitting at home - wouldn't you rather be making money?

GET MORE LEADS
Look at roofs of surrounding buildings of an upcoming job and see who else needs a new roof. Export a high resolution picture and send them a quote - marketing tools with intelligence!

NEW HOURLY PRICING STRUCTURE!

✓ GAF certified contractors receive twice as many hours as non-GAF contactors receive —at the same price

✓ New hourly pricing allows unlimited users to view any mapped geographic location in the US—no restrictions!
