- € What methods do you use to keep informed of changes and updates to building codes, energy standards, new product trends etc?
- € What sustainability best practices can you share?
- € Is your company a member of your local USGBC chapter?

Sustainable Roofing Council Pledge

Our company actively works to reduce the environmental impact of our business, including where possible recycling jobsite materials and roofing scrap; and working to conserve energy, water, materials, and other resources in our operations. If roofing material recycling is not available in my area, we pledge to begin roofing membrane and insulation recycling when a viable option is identified or on those jobs where recycling is economically viable*.

Name

Email address

Title

Date

** Recycling activity is verified by the load slips, weigh tickets or other information the contractor provides. GAF reserves the right to audit recycling activities. If an economically viable recycling option is not yet available in your region, you pledge to begin recycling when it does become available, conduct the remainder of your business in an environmentally friendly manner, and complete the other requirements of the certification.*

GAF reserves the right to accept or reject, at its sole discretion, applications for the Sustainable Roofing Council designation, and to change the requirements at any time.
