

## MOBILE DEBRIS MANAGEMENT

Removing debris from a jobsite has never been easier with the Equipter RB4000. **Save time and improve productivity with this self propelled, job site maneuverable, versatile disposal equipment.**

### Equipter's RB4000 Features:

- A six foot wide trailer that is self propelled and maneuverable; can fit into yards and spaces that a full sized truck cannot
- A 4000 lb job site container capacity and an 12 foot lift capacity
- A hinged top that opens on each side of the trailer to reveal a 10 ½ foot catch area
- A hydraulic tailgate that allows you to easily dump into a larger container
- Easily hitched and towed to the job site using any medium sized truck

### Benefits for you:

- **Special discount** for GAF factory –certified contractors
- **Self- Propelled** and easy to maneuver . . . work in any sized yard or jobsite
- **Powerful vertical lift.** . . 12 foot lift allows you to position the container close to the roof for material disposal or lift building materials directly to workers already on the roof
- **Finish jobs quickly**, more efficiently, and more profitably
