

STINGER Cap Systems set the standard for securing roofing underlayments and housewrap. Whether you prefer pneumatic or non-pneumatic delivery, each STINGER tool automatically delivers the holding power of a cap with a staple or nail for best practice installation.

is now a **Preferred Vendor Partner!**

WHY STINGER?

BETTER.

- Professional-grade tools
- Prevents overdriving of fasteners
- Patented technology from the leader in cap fastening

FASTER.

- STINGER collated tools are 50% faster than applying caps by hand which allows the contractor to complete more roofs each year
- 200 shots between reloads means less down time reloading

SAFER.

- STINGER tools and caps allow the contractor to have a safer application by maintaining 3 points of contact (1 hand, 2 feet).

WHY CAPS?

- Roofing manufactures, **including GAF**, recommend the use of cap nails in synthetic roof deck protection.
- Reduces moisture penetration onto the roof deck
- Reduces tearing away of underlayment in windy conditions
- Proven performance over nails and staples alone

STINGER is provided exclusively by National Nail Corp. GAF does not endorse, is not responsible for, and disclaims all liability in connection with any services provided or any claims made by National Nail and STINGER.
