

## Quickly and easily add customer information and signatures to the documents you use every day!

Simplify the way you manage the creation and storage of estimates, proposals, contracts, change orders, lien waivers, and even your customer surveys.

SmartDocs also makes it easy for your customers to sign off on any of those documents, with an e-signature that they can provide online and on any device.

### Smart Templates

- Easy-to-use tools help you setup your most used documents
- Automatically populate with the correct customer information
- Create a template once and use it for every job
- Save time and money

### Digital Signatures

- Make it easy and convenient for your customers
- Sign online or in person on any device
- Securely capture signatures the instant they are completed

### Use Your Documents

- Convert the documents you are already using into SmartDocs
- Save money on custom printing ... no more walls of filing cabinets to store your paper documents
- Whether a document is being prepared, out for signature, or signed – it will always be available in your AccuLynx job folder
- Never lose another document because they are stored safely in the cloud.
